

# Eye On The World

On 2015, after I finished my college entrance examination, my family planned a trip to go to Germany. As far as I went there, I felt the differences between Taiwan and Germany. My first time impression of Germany were left with the traffic conditions, not like Taiwan's traffic are complex and chaotic. There did have a lot of cars and motorcycles in big city. However, even in bumper-to-bumper traffic I still could not see motorcycles weaving in and out of the traffic. While I walked on the street of old city, the beauty of the structure really caught my eyes, they seem like the houses that exist in the fairy tale. Nevertheless, flowers that were planted on the balcony had been just icing on the cake. The delightful atmosphere make my family and I have a pleasant trip and a general memory of well-being.

When we traveled through Lindau, we saw schoolchildren and their teacher surrounded the model of old-time city. As the teacher asked question about the history of buildings, students actively answered. They actually brought the class out of school, it truly impress me. During the time traveling in Germany, I felt it gave me a chance come close to see and experience different culture, also broaden my horizon.
